A notification on the lines of that in force in British India (flag A) may be issued prohibiting the possession, sale etc of "bellubi patas".

As regards the licensing of the sale of the ingredients which go to make up these "bellubi patas", recommended by the Ch. Inspr of Mines (3rd linked file), all the D.C's are in favour of the same, but we may perhaps, watch how the above prohibition works before taking action in the matter. Some of these ingredients are said to be sold in small quantities for medicinal & other purposes and it may entail undue hardship on petty vendors if their sale is licensed. It is only when it is found that "bellubi patas" are still being manufactured illicitly, that it may become necessary to restrict the sale of the ingredients.

Sir,

In continuation of this office letter No.1318 dated 21st January 1929 enclosing copy of Government of India Notification No.1219 dated 8th November 1927 prohibiting the manufacture, possession and importation of any explosive consisting of or containing sulphur or sulphuret in admixture with chlorate of potassium or any other chlorate, I have the honour to bring to the notice of Government the marginally noted explosive accidents due to "Bellulli Pattas" in each of which two children were killed and several other persons were seriously injured.

1. Accident which occurred in House No.55, VII Block, Basavangudi Extension, Bangalore City on 11-11-28
2. Accident which occurred in Yelwal village Mysore Taluk, on 26-1-29

A report of the accident that occurred in Basavangudi, Bangalore City on 11-11-28 has already been submitted to the Secretary to Government, Law Department, by the District Magistrate, Bangalore District and a detailed report of the accident that occurred in Yelwal village, Mysore Taluk, together with certain recommendations for the licensing of the common ingredients of these dangerous chlorate mixtures, was submitted to Government with this office letter No.1680 dated 7th March 1929.

In view of the fact that Government Circular No.P.6462-70/Pol. 103-25-9 dated 29-6-1926, calling attention to the dangerous

nature

13

nature of these mixtures and pointing out that the manufacture and possession of such a mixture except under a license granted by Government is contrary to and punishable under the Law, does not appear to have minimised the number of such accidents, a Notification by Government on the lines of the Government of India Notification referred to above (copy enclosed for ready reference) seems both desirable and necessary in the interests of public safety.

Early orders of Government are solicited in the matter.

Subject: Prohibition of sale of ingredients which go to make up 'Bellulli Patas' except under licenses.

Adverting to your letter No. D.10952-59/Gl.76-28-3 dated 23rd April 1929 enquiring if the common ingredients which go to make up "Bellulli Patas" as are being sold individually without licenses etc., I have the honour to state that as these ingredients viz., Potassium chlorate, Arsenic Sulphides and antomony sulphide which go to make up "Bellulli Patas" or otherwise known as "Throw Downs" often prove to be dangerous to human lives, it is in my opinion, necessary that their sale is prohibited except under licenses as in the case of sulphur.

As to whether any of these ingredients are being now sold individually in the District, I have called for the required information from the District Superintendent of Police, and on receipt of it I will make a further communication.

Regarding the prohibition of the sale of ingredients which go to make up " Bellulli Patas"

Geol 66-28-19

With reference to your letter No. D.10952-59/Geol. 76-28-3 dated 25th April 1929 calling for my opinion regarding the prohibition of the sale of ingredients, which go to make up "Bellulli Patas", I have the honour to state that it is ascertained that out of the several ingredients potassium Chlorate is commonly obtainable in all the Gorcers' shops and does not seem be of such a dangerous nature as to require any restriction for its sale. The other ingredients are said to be poisonous and dangerous in a crude state and a restriction of their sale seems to be expedient.

SIR,

With reference to your No. D 10952-59-Geol.76-28-3 dated 22nd/23rd April 1929, enquiring whether "Bellulli Patas" is being sold individually without licenses etc., I have the honour to state that necessary steps are being taken by the Local Police to see that the above ingredient is not sold without a license. A rule prohibiting the sale except under licenses as in the case of sulphur may be framed as a remedy against accidents.
